

Headquarter perimeter entrance doors

Government solutions

Main entrances to government facilities can have many authorized personnel and visitors entering and leaving the building each day. Reliable physical security is an important part of protecting these buildings and ensuring the safety of the people and property within.

In addition, Anti-Terrorism Force Protection (ATFP), or blast protection, has become an area of focus in defense, federal building and structural design.

Headquarter perimeter door operational requirements:

- Doors are normally locked at all times
- Free egress at all times
- Access requires valid credential

Innovative solutions for headquarter building perimeter doors

The quality and durability of the Allegion products are a perfect solution for entrances, protecting against unauthorized access and complying with Anti-Terrorism/Force Protection when required.

aptiQ™ readers

- Approved by the U.S. Government under HSPD-12* for FIPS 201/PIV compliance as PIV aptiQ readers
- Available with five different data formats ranging from 75 to 200 bits

Steelcraft® L and B series steel doors

- Doors have high resistance to impact damage, low thermal conductivity and high STC ratings
- Door construction meets the requirements of ANSI and the broadest fire rating requirements

A more secure perimeter starts with the most reliable products

Perimeter doors are more than just an entrance. They are also a physical barrier between your secure environment and the outside. Allegion delivers a solution with tough, reliable hardware keeping buildings safe and secure.

- Von Duprin® 99 Series exit devices for fire and life safety
- LCN® premium door closers leading the industry in quality, durability and innovation
- Steelcraft® doors meet AT/FP criteria when used with Schlage® and Falcon® locks
