Put your trust in the name you know

For more than 90 years Schlage® has been providing innovative security solutions for schools, hospitals, government facilities and a host of other commercial buildings. Today, Schlage is at the forefront of cutting edge technology with electronic locking, wireless access, biometric and smart card solutions.

With a wide range of products, functions and styles, Schlage has what you need no matter how demanding your application. And we stand behind every product we make with an outstanding service organization that will be with you every step of the way. It’s our commitment to design, performance and technology that ensures you can stand behind our products too.

Reliable security with confidence

Schlage biometrics specializes in the development, marketing and service of biometric devices for access control and workforce management applications.

Located in the heart of California’s Silicon Valley, Schlage biometrics offers biometric technology as a secure alternative to easily lost or compromised ID cards and PIN numbers. The technology uses hand geometry to verify a person’s true identity.

When you choose a Schlage biometrics product, you can be sure that you have done the job right the first time. After all, our products are the most reliable and dependable on the market today. Our HandKey® II is easy to install and simple to maintain. That means fewer service issues for you and low total cost of ownership.
Biometric verification

How it works

**Hand Geometry**

Biometric products identify people by analyzing their unique human characteristics. Schlage Hand Geometry readers use field-proven technologies to provide increased security at any door and to ensure that the right person is at the right place at the right time. These technologies are frequently used in universities, data centers, day care centers, airports, health care facilities and government buildings.
Top 10 reasons to select Hand Geometry

**Field proven reliability**
1. Hundreds of thousands of HandKeys are installed all over the world in diverse applications, providing millions of error free transactions every day

**Convenience and cost savings**
2. Incredibly fast installation and intuitive enrollment increases user convenience
3. Verification in less than one second makes it ideal for high throughput applications
4. High product quality + low maintenance costs = low total cost of ownership
5. Eliminate the worry of lost, stolen or unauthorized transfer of ID cards plus the cost of purchasing and maintaining these cards

**Eliminate privacy concerns**
6. Hand Geometry technology is well accepted by end users, as there are no fingerprints or palm prints taken and the user does not leave behind any trace of their biometric data

**Amazing versatility**
7. HandKeys can be used as standalone systems to protect critical access points that can be easily integrated into virtually every new or existing access control system in the market today
8. Ability to customize user-specific security levels, time zones, holidays and languages based on your needs
9. Optional access control template management software allows the HandKeys to form a system that communicates alarms and transactions in real time, provides activity reports, allows supervised on-site or remote user enrollment and expiring privileges for temporary access
10. Environmental enclosures and integrated heater units make the HandKey an ideal solution for outdoor usage
Applications

The versatility and flexibility of the HandKey II lends itself to diverse indoor and outdoor applications.

Critical infrastructure

- Transportation hubs - at airports and shipping ports to grant access to authorized personnel to aircraft/ship operations, baggage handling and other sensitive areas
- Data centers - HandReaders accommodate a large number of users, offer a high level of security, are easy to use, provide for remote enrollment & eliminate the need to carry a card
- Construction facilities - highly robust and user friendly HandReaders operate well in nearly all environmental conditions; unaffected by dirt on the hands, poor lighting conditions, or the worn fingerprints endemic of manual laborers
- They are also installed at various government research facilities
- Prisons - monitor all comings and goings at prisons and eliminate the need for posting guards at all access sites and supplying them with keys
- Military installations - protecting US troops & assets worldwide by providing reliable access to the appropriate personnel

Healthcare facilities

- Pharmacy, surgery, long term care, and research facilities – increase security by providing access to secure areas only to authorized personnel

Financial institutions

- Safe deposit vaults - enhanced security to gain access to safe deposit boxes without the need for personnel to accompany the customer in and out of the vault

Education

- Residence halls - verify students to ensure that only authorized students gain access
- Recreational facilities - minimize people’s ability to transfer IDs and eliminate the need for keys / cards
- Dining halls - limit access to students who have paid for the meal plan
- Computer labs - provide access only to authorized personnel seeking access to sensitive equipment and information

Hospitality

- Lodging - access to high security, high valued openings such as data records and hotel supply areas
- Entertainment - access to high security, high valued openings in casinos, stadiums and theme parks

Commercial buildings

- Specialized high asset areas - access to high security, high valued areas such as IT, HVAC, conference rooms in addition to front doors
- Corporate campuses - provide high security to a variety of restricted areas like management offices and expensive high tech equipment rooms
Our HandKey II product is ideal for applications where consistent and dependable security is of prime importance. The product is easy to maintain, and provides an ideal mix of convenience, security and peace of mind.

In addition to all Hand Geometry benefits, the HandKey II offers:

- Convenience of multiple credential options such as proximity, magnetic stripe, barcode, iCLASS® and MIFARE®
- Field installable Ethernet module
- Outdoor enclosure options that make the HandKey II an ideal solution for outdoor usage
- Field upgradable and expandable memory options from 512 to 259,072 users for scalable security that grows with your needs
- Three user-definable outputs to connect to auxiliary devices such as audible or silent alarms, door locks or lighting systems
- Ability to write the industry’s most compact biometric template on a card instead of in a database results in higher security & unlimited user capacity
- Specially formulated antimicrobial coating with silver ions on the platen to inhibit the growth of bacteria, mold and mildew to mitigate hygiene concerns. The coating is safe and lasts for the life of the product
- Blue hand outline on the platen facilitates easy enrollment and reduces error rates during verification
Schlage biometrics offers a number of options and accessories to help you create a solution to meet your specific needs.

| **Relative humidity** | Operating: 20% to 80% RH Non-condensing  
| Non-operating (storage): 5% to 85% RH non-condensing |
A biometric that works indoors and outdoors

Schlage biometrics provides various options to protect your HandKey II from the elements. Two different, proven solutions are available to ensure your HandKey II keeps performing regardless of your environment.

FX enclosure

**Biometric HandKey enclosure**

Constructed from high impact UV resistant polycarbonate material, the FX enclosure provides a degree of protection against dusty, dirty, or rainy environments. This enclosure has been designed so that it can be added to an existing installation. When used with an integrated heater option (INT-HTR), it provides a comfortable heated platen against a cold climate.

TX enclosure

**Biometric HandKey enclosure**

The TX enclosure provides a higher degree of protection against dusty, dirty, or rainy environments. When used with an integrated heater option (INT-HTR), it provides a comfortable heated platen against a cold climate.

HandNet for Windows

HandNet for Windows lets you control and monitor a network of HandKey II readers. With just one comprehensive program, you can monitor activity and alarms on all readers, and control the access of each user.

- Automatic hand template management feature allows template distribution from enrollment HandKey II to other selected HandReaders thus eliminating the need for a user to be enrolled at every HandKey II
- Independent door control capability without the need for an access control panel
- Monitor multiple remote sites from the convenience of your PC
- Remote enrollment feature enables a HandKey II to be controlled from the software. For example a guard behind a glass partition or a supervisor in a distant office can enroll new users without physically going to the HandKey II
- Assign temporary access to selected users by specifying a user’s access start and stop days and times
- Manage archive activity to keep old information available for reports
- Manage alarms for additional security
