Benefits of multi-factor authentication

aptiQ™ smart cards utilize encrypted technology to offer the highest in credential security. Using an aptiQ multi-technology reader with keypad to implement multi-factor authentication can offer even more security by requiring both a card and PIN before anyone enters a restricted area.

High security areas like laboratories, records offices and server equipment rooms typically have a limited number of users, but require a very high level of security to protect private, dangerous or expensive materials, goods or information.

High security application

High security card access
