# Student safety and HEERF funding

As students return to colleges and universities in the fall, schools are looking for solutions that enable reopening, prevent the spread of viruses, and provide a better student experience. The federal government has issued several rounds of Higher Education Emergency Relief Funding (HEERF) to help institutions support student grants, recover lost costs due to the pandemic, and re-open to in-person classes in the fall.

## Using HEERF Funds to help monitor and suppress Coronavirus

Touchless and access control solutions help monitor and suppress Coronavirus, making openings safer by:

- Eliminating the spread of virus at multiple touch points on campus
- Allowing for remote access of buildings and rooms on campus
- Capturing data that can be used for contact tracing as students and staff move around the campus, preventing further spread of the virus
- Improving security, as smart and mobile credentials provide a higher level of security than some other credential technologies

“A portion of their institutional funds must implement evidence-based practices to monitor and suppress coronavirus in accordance with public health guidelines.”

ARP Institutional Portion for Public and Nonprofit Institutions (a)(1)

## Recommended Access Control Solutions

1

### Touchless solutions

Touchless Solutions such as automated openings with auto operators and touchless actuators or readers can be used on both exterior and interior openings to eliminate touches. LCN offers a variety of automatic operators that can be combined with LCN touchless actuators. When a pedestrian waves his or her hand in front of the wall plate, the technology senses the motion and acknowledges intent to enter. No contact with an actuator, door handle, push bar or door is required.

Allegion also offers a variety of Handsfree solutions, featuring products that allow you to operate the door without using your hands, such as arm and foot pulls.

2

### Mobile access solutions

Mobile credentials and mobile enabled hardware allow students to use their mobile devices to access buildings and doors, for dining and bookstore payments, and for printing, transportation and other services. Mobile credentials are deployed virtually, eliminating the need to visit the card/ID office for campus ID's which reduces in-person contact. Schlage Mobile Student ID leverages NFC technology and contactless readers, allowing students to easily gain access and make payments around campus.

### 3

#### Contactless Smart credential solutions

If you've been looking to upgrade security to contactless smart credentials, this solution can also help suppress the spread of virus on campus. Smart credentials utilize high-security encryption to ensure the protection of sensitive information and cannot be duplicated. And like mobile devices, smart cards can be used for many types of transactions.

Schlage's 13.56 MHz contactless smart credentials are offered with MIFARE Classic®, MIFARE Plus® or MIFARE® DESFire® EV1 and EV2 technologies.

# How Allegion can help

These HEERF funds were issued to help institutions of higher learning recover from the COVID-19 pandemic and prepare them for in-person learning in the fall of 2021 and beyond.

We understand that you are balancing many initiatives that need funding, and HEERF provides an opportunity to upgrade credentials, while monitoring and suppressing the Coronavirus.

Allegion has security consultants throughout the United States that can help answer questions and recommend access control solutions, so that you get the most of your budget.

## Other Allegion services include:

- Develop facility standards to drive consistency throughout your locations
- Coordination of electronic access control
- Pre-installation site visits to train personnel on product installation, maintenance and use
- Post-installation site visits to ensure all products are installed properly, will pass inspection and are in good working condition
- Consult on adopted building codes to ensure fire, life safety and accessibility requirements are met
- Create specifications and hardware schedules for new construction and renovation projects

The issue of school security is more than a product conversation for Allegion. We want to partner with you to make your campuses healthy, safe and secure. You can learn more at [us.allegion.com](https://us.allegion.com)

## About Allegion

Allegion (NYSE: ALLE) is a global pioneer in seamless access, with leading brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Focusing on security around the door and adjacent areas, Allegion secures people and assets with a range of solutions for homes, businesses, schools and institutions. Allegion had \$2.7 billion in revenue in 2020, and its security products are sold around the world. For more, visit [www.allegion.com](https://www.allegion.com)
