**ALLEGION EXPANDS ACCESS CONTROL BEYOND PERIMETER
AT 2016 ISC WEST CONFERENCE**

Leading Global Security Solutions Provider to Showcase Products with Easy Installation, Seamless System Integration, Flexibility to Meet Business Needs

CARMEL, IND. (March 25, 2016) – Allegion, a leading global provider of security products and solutions, will attend and showcase real-time connectivity solutions, smart locks, interior access control and more at the International Security Conference (ISC) West, April 6-8 in Las Vegas.

The conference is the largest physical security event in the U.S., covering topics including access control, alarms and monitoring, biometrics, IP security and networked security products.

Allegion will be located at booth 20015 inside the Sands Expo Center, highlighting the newest product innovations from its industry-leading brands Schlage®, LCN® and Von Duprin®. In addition, Allegion will showcase ENGAGE™ Technology, which signals a new era in connectivity, combining the latest innovation in security with the value that every business needs.

Attendees will learn about solutions that offer a variety of benefits including easy installation, seamless integration with alliance partners and scalable lock management options.

Products to be featured include:

- [Schlage NDE Series Wireless Locks with ENGAGE Technology](#)
- [Schlage Control™ smart interconnected locks and deadbolts](#)

SCHLAGE NDE SERIES and ENGAGE™ GATEWAY

Schlage NDE Series wireless locks offer a new level of intelligence and efficiency to interior doors at an extremely affordable price. The NDE Series combines the card reader, request-to-exit sensor, door position sensor and lock-into-one device, which simplifies installation at the door. To ensure minimal downtime, the NDE Series can be installed in minutes with just a Phillips screwdriver – no need to drill holes or run wires to each opening.

With the ability to connect up to 10 NDE Series locks and Control Deadbolts within a range of up to 100 feet, the ENGAGE Gateway is designed to be used with all devices that feature ENGAGE technology. By utilizing alliance member's systems, this solution offers real-time networked connectivity and audited access trails throughout the facility. The Gateway has a versatile design to fit nearly anywhere and integrates seamlessly to leverage existing IP-based or RS-485 infrastructure for maximum flexibility.

Built-in Bluetooth® enables NDE Series wireless locks to connect directly to smart phones and tablets, eliminating the need for costly proprietary programming tools during initial setup and configuration management.

“By delivering affordable hardware and simplifying installation and set-up, we’re meeting customer demand for a cost-effective solution with the flexibility to enable more access points on their existing system,” said Ben Hopkins, product marketing manager at Allegion. “In the six months since the Gateway launch, we’ve formed strategic alliances with nearly 50 software system members. I’m excited to offer a solution through our alliances that will enable customers to extend access control deeper into the building.”

SCHLAGE CONTROL

Schlage Control™ smart deadbolts and smart interconnected locks are designed to eliminate the hassle of traditional keys for multi-family facilities by utilizing smart card and mobile credential technology. Schlage Control Smart Locks allow integration with third-party electronic access software applications, which delivers the ability to manage both residential and common area doors on the same system.

“These recent innovations in Allegion’s suite of security products represent the next generation of electronic access for multi-family facilities,” said Ann Matheis, marketing leader, multi-family at Allegion. “We are dedicated to helping our customers navigate the toughest security challenges, and these solutions streamline property management operations, installation and programming.”
