## **ALLEGION TO DEBUT SCHLAGE LE SERIES WIRELESS LOCKS AT ASIS INTERNATIONAL IN ORLANDO**

*Leading Security Solutions Provider to Educate Attendees on Convenience, Efficiency and Affordability of its Latest Cutting-edge Products*

**CARMEL, IND. (August 30, 2016)** – [Allegion](#), a leading provider of security solutions for homes, businesses and institutions, announced it will be showcasing the Schlage® LE Series wireless lock for mortise doors and other innovative products at the 62<sup>nd</sup> annual [American Society for Industrial Security \(ASIS\) International Seminar and Exhibits](#).

Allegion will be at booth 2551 inside the Orange County Convention Center in Orlando, Fla., Sept. 12-15, providing more than 20,000 security professionals from around the globe with the education and insights needed to improve their day-to-day efficiency while staying up-to-date with today's evolving security challenges.

“Technological advancements have continued to evolve the way we operate in the security industry,” said Brad Aikin, Electronics Portfolio Leader at Allegion. “We’re continuing to learn more and more about how electronic access control solutions can be integrated more deeply with the building, and the Schlage LE Series wireless lock for mortise doors is our latest example of how Allegion is delivering unique experiences through innovative architectural hardware.”

The LE Series featuring ENGAGE™ technology is designed to affordably extend electronic access control deeper into the building. LE locks are ideal for suite entrances, office doors, and sensitive storage spaces.

LE locks offer both the simplicity of a standalone solution through ENGAGE web and mobile application capabilities and the sophistication of a fully integrated solution with software from one of Allegion’s independent access control software alliance partners.

“We are really excited about this year’s show in Orlando,” said Robert Gaulden, Director Aftermarket & Electronic Sales at Allegion. “We have a great booth setup, and we’re looking forward to telling attendees more about what makes Allegion a global pioneer for safety and security products and solutions.”

In addition to the LE locks, Allegion will also feature [Schlage Control™ smart locks](#). Schlage Control smart locks are specifically designed to improve operational efficiency and safety within multi-family properties. The open integration capabilities in conjunction with ENGAGE, offers flexible, streamlined control and the ability to integrate with an alliance software partner to manage a wide spectrum of facility needs.

To schedule an in-person meeting with an Allegion representative at ASIS, [click here](#) or visit Booth 2551 during the conference.
