

ALLEGION™

Allegion consulting services

Allegion consultants are experts in door hardware and security solutions. You are an expert in your field. Let us help create a bridge to connect you to the solutions you need at no charge. We will add value to your project, without adding to your budget.

Our complimentary services

Site assessments

We can assess existing buildings for compliance with current safety codes, building codes, ADA, and lockdown capabilities and make suggestions for improving security.

Access control coordination

We work with you to align existing technologies with our open architecture solution to control access and provide electronic lockdown capabilities. We make recommendations for platforms, coordinate EAC, prepare presentations and cost analyses to gain alignment, provide case studies, implement pilot programs, and more.

Key management

We can assist with layered security approach to key control, combining standard open security with restricted solutions to provide you total control of your facility.

Specification services

Hardware specifications are often overbuilt, vague or inaccurate. Our team will work with your project architect to ensure accurate hardware sets are developed with the product standards you have selected.

Budgetary planning

We can help you put together budgetary estimates to give you a glimpse into project costs prior to starting a project. From mechanical solutions to electronic access control, we are sure to have the solution that fits your project needs. And once a project is kicked off, we will review and comment on all door hardware submittals to ensure accuracy.

Code compliance

Consult on adopted building codes to ensure fire, life safety and accessibility requirements are met.

Product standardization

We can help you standardize on solutions and products across your facilities to streamline costs and drive consistency throughout your buildings.

Healthy environments

Allegion is dedicated to promoting health and well-being through industry best practices and innovative door opening solutions. Openings in healthy environments contain a variety of features including physical security solutions, electronic access control, sustainable products, and hardware for hands-free or touchless applications.

New construction/renovation projects

Create specifications and hardware schedules for new construction and renovation projects, including pre-installation site visits to train personnel on product installation, maintenance and use and post-installation site visits to ensure all products are installed properly, will pass inspection and are in good working condition.

Overtur™

Our proprietary platform is a centralized hub of door opening information for seamless communication and visibility throughout construction projects and beyond. Overtur can be used for surveying existing sites, specifying modernization and new construction projects, post construction punch walks, collaboration with team members, and more.

Hardware installation training

Allegion is here with you during every step of your project:

- Pre installation: Meet onsite and train installers on correct installation of Allegion hardware.
- Post installation: Meet onsite and walk every opening to assist you in preparing a door hardware punch list for the general contractor to ensure the job is completed accurately.
- After the sale: Train the facility managers on Allegion hardware maintenance, troubleshooting and common infield adjustments
