

Security sensitive areas— networked doors

Healthcare solutions

Today's healthcare environments have security sensitive areas that may require networked access control with real-time management and monitoring.

Pharmacies, patient records, medical supplies, electrical or building controls and other areas with restricted access require a higher level of security and a record of when and by whom the area was accessed.

Operational requirements:

- Visibility and control of when and by whom areas are accessed
- Ability to easily and economically secure openings without disruption to patient care areas
- Doors that cannot be propped open or prevented from closing completely
- Easy and efficient use of credentials

Innovative solutions for security sensitive areas—networked

Schlage® AD Series electronic locks

- Wireless electronic lock options that eliminate the need to run wires, making installation easy and less disruptive to patient care
- Allows for easy-to-use credentials for every staff member, eliminating the need to share keys or codes, or prop the door open
- Designed on an open architecture platform so that it can easily be integrated into virtually any access control system for simple access rights management and real-time monitoring of each opening

aptiQ™ and aptiQmobile™ readers and credentials

- Streamlines daily operations while enhancing overall security
- **aptiQ readers:** Multi-technology readers allow more than one type of credential to be used, ultimately simplifying technology migrations
- **aptiQ smart cards:** Single credential for multiple functions, such as access control, logical access, payments and vending
- **aptiQmobile:** Allows smartphones to be used as a credential

LCN® door closers

- Proven strength and reliability that doors will close and latch properly
- Variety of options for concealed door closers that are ADA-compliant, UL- and/or cUL-listed and ANSI-certified
- Available in numerous finishes and arm or track functions to meet virtually all architectural requirements

Note: These security solutions are designed only as a guide and do not take into consideration local codes and regulations that may be in place. Please contact your local Allegion representative to design a specification to meet your unique needs
