Maintain design throughout a facility with the M Collection

Door hardware is both a functional component and an architectural element, so you want to design facilities with door hardware that is both strong and stylish... durable and decorative... well-built and well-designed. The M Collection, featuring both Schlage® and Von Duprin®, does just that—and more!

With 15 different styles, this line of decorative levers gives you more choices than ever before! The M Collection allows you to maintain a custom, high-style look on doors throughout any building, from the main entrance to the supply closet. Even more, with the ability to coordinate M Collection levers with Schlage locks and Von Duprin exit devices, you're guaranteed consistent style and functionality throughout your facility—not to mention unrivaled security.
Features:

- **Durability**: The M Collection decorative levers are made of solid brass or solid stainless steel for a strong, yet comfortable, feel.

- **Style**: There are eight finish options available:

<table>

<td>061</td>
</tr>
</tbody>
</table>

- **Consistency**: The M Collection features bi-directional, independent movement, allowing upward and downward motion without disrupting the opposite side of the door.

- **Streamlined design**: Levers are void of unsightly screws, allowing the lever to accent your door without distraction.

- **Compatibility**: The M Collection is compatible with our mortise lock, tubular lock and exit devices, maintaining the hardware’s artistry, consistency and quality throughout a room, floor or an entire facility.

All 15 of the M Collection designs can be paired with any of the following commercially graded products for suiting across an office, floor or an entire building.

**LOCKS**

- **Schlage L-Series mortise locks — Grade 1**: Schlage L-Series locks have long been the industry standard for mortise locks, with a comprehensive offering of functions and options to support any opening need.

- **Schlage LT-Series tubular locks — Grade 2**: The perfect complement to the Schlage L-Series or the Von Duprin exit devices, the LT-Series Tubular chassis is based on the venerable L-Series mortise lock and provides an alternative to lever suiting for interior doors.

**EXIT DEVICES**

- **Von Duprin 98/99 exit devices — Grade 1**: Von Duprin created the first exit device in 1908, and continues to redefine the industry today with unsurpassed quality and unique features such as concealed vertical cables. The 98/99 Series exit device is intended for standard-stile doors.

- **Von Duprin 33A/35A exit devices — Grade 1**: Offering the same innovative features as the 98/99 Series, the 33A/35A Series of exit devices is intended for narrow-stile doors.

- **Von Duprin 94/95 exit devices — Grade 1**: The 94/95 has the pushbar trim recessed into the door to minimize the external profile, allowing more room for people and equipment to move.
