

## Schlage Control™ Smart Locks ideal for multi-family properties

The new Schlage Control Smart Locks provide a great way for integrators to expand into the multi-family market and offer an affordable electronic security option.

### Modern convenience

Schlage Control Smart Locks offer unparalleled convenience that makes them more attractive to multi-family property owners and residents alike. Property owners value the no-tour functionality that allows them to create credentials and update a lock within seconds, without having to tour the lock. And, residents can use a smart credential or even their phones to gain access to their home. Plus, with smart credentials—or a third-party mobile app—the need to manage keys is eliminated.

### Schlage secure

Integrators can be confident in the strength and quality of the lock itself. The innovative design of the Schlage Control Smart Lock—no key and no cylinder—provides a high level of security. All locks are pickproof and bump proof. Additionally, they feature a BHMA Grade 2 certification. The locks also provide visibility to past activity and audit trails are retrievable. Schlage Control Smart Locks are 90-minute UL fire-rated.

### Efficiency that leads to profitability

With the Schlage Control Smart Lock, integrators are selling more than convenience and security. With efficiency-boosting capabilities, the locks allow properties to focus on operating more profitably. Thanks to the integrated ENGAGE Technology, the locks can be controlled through the cloud using mobile applications and integrated with third-party access control platforms. This open architecture design allows property owners to manage both residence and common area doors, streamlining operations (and saving money) from a single software platform.

### Appealing style

Finally, with an appealing, contemporary design, the new Schlage Control Smart Locks will grab the attention of prospective residents. The locks are available in Schlage's popular Greenwich and Addison trim styles and in the Satin Nickel, Aged Bronze, Satin Chrome and Bright Chrome finishes. With so many options, you'll be able to provide clients with the ability to easily suite with other hardware and enhance the overall styling of a building or property.
