A solution that meets everyone’s needs.

Our research team interviewed 17 locksmiths, installers and facility managers to understand their experiences with concealed vertical exit devices. The vast majority of survey respondents report never having to return to service concealed cables.

- **Improved aesthetics** — no surface vertical rods or mullions
- **Reduced maintenance** — remains properly adjusted

Why choose cables?

“**It’s been about 2 years...not one issue with the cabling system.** Every other door has failed at least a dozen times in that timeframe.”  
– Locksmith, Education

“Positive in its locking, and the engineering or the design of the latching units is a very good one.”  
– Facilities Manager, Education

“You have to pull the door off in order to get the rods out, on the cables you don’t have to.”  
– Facilities Manager, Education

“More often than not, it’s a security issue. The door won’t close and latch.”  
– Locksmith, Education

The problem with rods

- Typical maintenance incident for rods takes **2 techs about 3 hours**
- On average, **6/10** concealed rods will require service annually
