

Enhanced QEL from Von Duprin®

Simple door operations can echo through a hallway or space, causing disruptions and noise, which ultimately, takes away from the ambiance of an environment.

Von Duprin solves that problem with its innovative [Quiet Electric Latch \(QEL\) option](#) that provides electronic control of an exit device for environments where limited operational noise is desired. And now, with the growing demand for quiet solutions in the marketplace, Von Duprin has made enhancements to the QEL so it's even more feature-rich—and all for the same price for the standard QEL option.

The updated QEL provides many new benefits, including:

Simplified installation and maintenance:

- **New modular conversion kits** for both panic and fire-rated devices reduce installation time and complexity.
- **Auto-adjust latch retraction** automatically adjusts the latch throw and pull every time the device is cycled.
- **On-board diagnostics**, including an LED low voltage indicator.
- **Improved PCB mounting layout** optimizes position of the wires for installation and maintenance.

Expanded application coverage

- **Hex dogging option** allows the device to be manually dogged or undogged as needed.

These new features are in addition to the ones you already count on today, including:

- **Quiet motor driven** operation for environments where ambient noise must be minimized.
- **Energy-efficient motorized latch retraction** utilizes standard 2 amp power supply with longer wire runs.
- **Genuine Von Duprin parts** that protect your investment and warranty.

Together, these features allow the QEL to be installed with even more ease, making you feel good that you're specifying hardware that saves time and effort—not only during installation, but also over time, as the opening is maintained.

ALLEGION™

The QEL is generally specified for applications such as:

- Hospital patient areas
- Libraries and classrooms
- Auditoriums and theaters
- Churches and chapels
- Ballrooms and conference areas
- Other large occupancy areas

The QEL is available on all Von Duprin 98/99, 94/95 and 33A/35A Series exit devices, regardless of their current state. For example, a standard rim device without EL or QEL can be upgraded to the new QEL while keeping existing devices.
