Architectural hardware consulting services
While door hardware comprises a small part of a building’s architecture, it’s what experiences the most daily contact—and often causes problems during construction.

At Allegion, we help streamline the specification process. Our consultants have experience with the unique needs of various types of facilities, including education, healthcare, multifamily and government projects. Our goal is to simplify hardware specifications and provide the right products to meet the needs of all of your opening and building requirements.
Overtur™ is a cloud-based suite of tools for the specification and security design of doors and openings on BIM and non-BIM projects. In Overtur you can:

- Review designs in an online environment to easily capture decisions and requirements
- Upload door data, schedules and plans directly from a BIM
- Transfer door data—including electrical requirements—to and from Allegion to streamline the specification cycle
- Graphically track changes

Allegion products are designed to complement your architectural vision and function in a way that suits the operational and security needs of a facility. We offer a range of experience with doors, frames and electronic and mechanical hardware that meet even the most demanding code requirements.

When you partner with Allegion, you receive:

- **A dedicated resource.** Regionally located so you can count on them, our consultants have a thorough understanding of your firm and clients.

- **Clear communication.** We’ll relay any issues or areas of concern and work with you to identify the best solutions.

- **Customized solutions.** We provide solutions that are both aesthetically and functionally appropriate.

- **Security that matters.** Our products exceed the highest security standards as well as provide opportunities to integrate with other systems and features in the building.

- **Strong collaboration.** Overtur™, Allegion’s cloud-based collaboration tool, improves coordination of specifications and hardware sets for all members of the project team.
Our hardware consultants know their stuff.
We have more than 150 hardware consultants located across the nation who are all well-versed on local and national building codes, the unique needs of various types of facilities, and access control and egress requirements—all the things you need in specifying door hardware solutions.

How we can help

- Prepare a complete hardware specification, hardware sets and numerical door index.
- Provide product catalog cuts.
- Assist with product substitution requests, application and product questions/RFIs, and the value engineering process.
- Review and comment on hardware submittals.
- Offer AIA-certified training on building codes, open architecture, electronic access control, vertical market topics and mechanical hardware.
- Consulting on necessary building codes to ensure fire, life-safety and accessibility requirements are met.
- Coordination of door hardware and access control.
- Review building programming, product options and potential conflicts with security issues.
- Conduct job site reviews, pre-installation meetings and post-installation inspections.
Our hardware consultants know their stuff.
