

ALLEGION™

Architectural
hardware
consulting services

Allegion™ products are not only designed to complement your architectural vision, but also to function in a way that suits the operational and security needs of a facility. We offer a range of experience with electronic and mechanical hardware, doors and frames and can help you specify the right products to meet the needs of all of your applications and building requirements.

How we can help

- Hardware specifications
- Hollow metal door frames and specifications
- Door schedules
- Review substitution requests
- Review hardware submittals
- AIA-certified training
- Compliance to building, life-safety and accessibility codes
- Job site reviews and pre and post installation inspections
- Coordination of door hardware and access control

Allegion offers quality, security solutions including:

Schlage® electronic and mechanical locks, readers, credentials, and access control solutions

Von Duprin® exit devices

LCN® door closers and auto operators

Ives® door accessories

Glynn-Johnson® overhead holders and stops

Steelcraft® doors and frames

Falcon® locks, exits and closers

AD Systems™ high-performance door systems

Brio® sliding and folding doors

Republic commercial steel doors and frames

TGP fire-rated entrance and wall systems

Zero International premium sealing systems

When you partner with Allegion, you receive:

- **A dedicated resource.**
Regionally located so you can count on them, our consultants have a thorough understanding of your firm and clients.
- **Clear communication.**
We'll relay any issues or areas of concern and work with you to identify the best solutions.
- **Strong collaboration.**
Overtur™, Allegion's cloud-based collaboration tool, improves coordination of specifications and hardware sets for all members of the project team.
- **Customized solutions.**
We provide solutions that are both aesthetically and functionally appropriate.
- **Security that matters.**
Our products exceed the highest security standards as well as provide opportunities to integrate with other systems and features in the building.
- **Expertise.**
We have more than 150 hardware consultants who are all well-versed on codes, the unique needs of various types of facilities, and access control and egress requirements.

Contact us at **888-868-9110** and we'll quickly connect you with an Allegion hardware consultant in your area or go to www.allegion.com/us

Allegion's Overtur™ is a cloud-based suite of tools where architects and door hardware consultants collaborate on specifications and the security design of doors and openings on BIM and non-BIM projects.

Overtur provides a variety of applications ('apps') to accomplish such tasks as:

- Review designs in an online environment where you can easily capture decisions and requirements about your project's hardware.
- Upload door data, schedules and plans directly from a Building Information Model (BIM).
- Transfer door data — including electrical requirements — to and from Allegion to streamline the specification cycle.
- Graphically track and review the important changes to openings and hardware selections.

Improved collaboration, coordination, and productivity. Overtur can simplify the process of specifying door hardware on your next project. To learn more, visit discover-overtur.allegion.com or call 888-868-8774.

Sustainable building

At Allegion, we are pioneering safety by protecting people where they live and work and protecting our environment at the same time. We promote the health and safety of our employees, customers and local community members worldwide through our commitment to conducting business in a safe and environmentally responsible manner.

Leadership in Energy and Environmental Design

Allegion recognizes the value of the Leadership in Energy and Environmental Design (LEED) rating system to building environmentally safe and sustainable structures. By using Life Cycle Assessment and Environmental Product Declarations, we aim to provide our customers with the information they need to make decisions regarding their own sustainable building concepts and green solutions.
