Pushing forward
To advance fire and life safety
Pioneering safety is in our DNA

Carl Prinzler created the first self-releasing fire exit device after the Iroquois Theatre fire in 1903—a show he was supposed to attend. Out of devastation, a passion was ignited and, today, many public facilities, including theaters, schools and commercial offices, rely on Von Duprin exit devices to keep people and property safe.
Withstanding the test of time

Von Duprin continues to advance the industry through customer-centric innovation, which delivers solutions to the most challenging applications. We lead with performance that provides peace of mind and flexible solutions that protect your investment by adapting to change.
