ND Series
Grade 1 cylindrical locks

Mechanical
Wired electrified
Wireless electronic
The Schlage® ND Series cylindrical locks

Walter Schlage invented the cylindrical lock in 1920. Since then, Schlage Lock Company has consistently delivered innovation and continuous improvement. In that tradition, we are extremely proud to introduce the redesigned ND Series cylindrical lock.

Most manufacturers' approach to locks ends with simply meeting industry standards like Grade 1. With the Schlage ND, Grade 1 is just the beginning.

Performance beyond Grade 1
The Schlage® ND family significantly exceeds BHMA Grade 1 requirements for cycle, lever torque, hammer blow, lever pull and other tests. This means confidence that the lock will last—whether the application calls for high abuse resistance or just operation over millions of cycles—without any degradation in performance.

Comprehensive offering for every opening
Mechanical, wired electrified and wireless electronic solutions allow a common aesthetic and consistent user experience throughout the building while lowering the total cost of ownership.

World-class design
A proven, easy to install product with extensive function, keying, trim and finish capabilities that work in nearly any applications.
Applications
The Schlage ND is extremely versatile and is regularly used in healthcare, education, government, office, retail and other commercial applications.

With 31 mechanical functions, the ND’s range spans from the simple (non-locking passage) to complex (double-cylinder security) to specialized (school time-out lock).

Because the ND uses an ANSI 161 door prep, commonly used across cylindrical locks, it is ideal for both new construction and retrofit applications.

Key features
- Significantly exceeds ANSI/BHMA A156.2 requirements for Grade 1 cylindrical locks
- 31 mechanical functions (see adjacent columns for wired electrified and electronic options)
- Nine lever designs, two rose designs
- 10 available finishes
- Supports standard, SFIC and FSIC cylinder formats
- Multiple key systems available – open, patented, restricted, geographic exclusive, UL437
- Support for 10 non-Schlage cores (see cylinder section)
From mechanical to wired electrified to wireless electronic, the ND Series offers a grade 1 solution for the entire project.

**ND mechanical**
Suitable for all openings

**ND wired electrified**
Ideal for high-traffic access control

**NDE wireless electronic**
Ideal for low-traffic access control
**STRONG**

The ND Series has been redesigned to make it the strongest cylindrical lock Schlage has ever built.

- No access with minimum 3,100 in-lb abusive lever torque — the equivalent of over 690 lbs applied to the end of a 4 1/2" lever (2.6x BHMA requirements¹)
- No access with minimum 1,600 lbs offset lever pull for protection against pry bar attacks (8x BHMA requirements)²
- No access with minimum 100 vertical impacts for protection against sledgehammer attacks (20x BHMA requirements³)
- Near zero droop and wobble after 16M cycles (16x BHMA requirements¹), without the use of set screws or O-rings
- Latch retraction with 200lb preload for confident operation in warped and preloaded doors (4x BHMA requirements)

¹ Beyond grade 1 performance for ND locks with Schlage cylinders only (standard, FSIC & SFIC). Performance with non-Schlage cylinders will exceed BHMA grade 1 requirements but may be less than the performance of products with Schlage cylinders.

² Vertical impact testing stopped after 100 blows with no sign of failure or stress.

**SECURE**

A strong lock is only part of the security equation—proper key and card access control is equally important.

- Everest 29™ cylinder with S123 keyway is provided standard which prohibits unauthorized key duplication at local stores and is patent protected until 2029
- Available restricted and geographic exclusive keyways for advanced key control
- Available compatibility with 10 different non-Schlage key systems
- SL cylinder option allows SFIC keyway use in a conventional cylinder, providing multiple new keying solutions including geographically exclusive SFIC when paired with Primus XP
- Wired electrified and wireless electronic locks enable the use of electronic credentials for increased visibility and control over access
- Schlage smart credentials with MiFare® DESFire® EV1 technology utilize encryption, mutual authentication and key diversification to ensure the highest levels of security
SMART

Smart means using innovation to make your project more efficient, flexible, and easier to install and use.

- One platform, three solutions (mechanical, wired electrified, wireless electronic)—same look and feel throughout the building for a common user experience and lower cost of ownership
- Wired electrified lock has autodetecting 12/24V input, selectable EL/EU operation, and plug-in Request to Exit (RX) for installation and inventory flexibility. Energy efficient design allows multiple locks on a single power supply with no “hot levers”
- Wireless electronic locks with ENGAGE™ can be managed with an access control system or with convenient ENGAGE web and mobile applications.
- Wireless electronic locks provide the option to leverage existing network infrastructure for offline or real-time applications
- Can upgrade from ND mechanical lock to NDE wireless electronic with only a screwdriver

Schlage is more than locks. It’s the complete infrastructure of support throughout the entire build and ownership process.

- Order entry, customer service, technical support, engineering and manufacturing co-located in the same building in Colorado Springs, Colorado
- Comprehensive support from our sales offices including consultations, masterkey development and training; industry and code training, specification writing, and product service
- Schlage products suite with other Allegion brands including Von Duprin® exit devices, LCN® door closers, and Steelcraft® doors and frames
- Custom engineering department can develop specialized functions, trim and finishes for unique applications
- Trusted partner for nearly 100 years
A detailed look...

**ND mechanical**

- New adjustment plate along with "hands free" torque plate for exceptionally easy installation
- New levers for better fit and easier installation
- New cast steel spindle for strong and durable performance—without droop or wobble
- Expanded cylinder support for Schlage and 10 non-Schlage formats
- New standard latches exceed 4x BHMA pre-load requirement
- New interior buttons for easier operation

**ND wired electrified**

- Autodetecting 12-24V DC input automatically adapts to input voltage for inventory and installation flexibility
- Standard Molex connector for easy wiring
- Modular RX Request to Exit (RX) module can be "plugged in" for inventory and installation flexibility
- Efficient motor-driven design
  - 0.230 amp max current draw for more locks per power supply
  - 0.010 amp holding current eliminates "hot levers"
  - Quiet operation
- Switch-selectable EL/EU Change mode (electrically locked or unlocked) anytime via switch on chassis

**Key features**

- Schlage • ND Series
NDE wireless electronic

All mechanical features +

- Built-in Bluetooth enables wireless configuration from smartphones and tablets
- Built-in Wi-Fi enables automatic updates to access rights
- Integrated multi-technology reader reads both 125 kHz proximity and 13.56 MHz smart credentials
- Fits standard ANSI 161L prep installs in minutes with only a Phillips screwdriver
- Mechanical key override compatible with most popular key systems
- Built-in No-Tour eliminates the need to visit the locks by using smart credentials to update access rights
- Integrated door position sensor requires no additional prep
- Up to 2 years of battery life with 4 AA batteries

For more information on finish options, please consult the factory.

---

1. Boardwalk, Longitude, Omega, Rhodes, Sparta and Tubular levers comply with California State code for return within 3/16 of door face.
2. Athens, Rhodes, Sparta and Tubular levers support cylinders from other manufacturers, see cylinder section on page 24 for details.

---

Product information and specifications contained in this catalog are subject to change without notice. Please consult the factory.
Accessibility and life safety

Door hardware should be as effective in helping people go about their lives as it is in securing their environments. The Schlage ND is designed with this requirement in mind.

Accessibility
All Schlage ND levers comply with the Americans with Disabilities Act (ADA), which requires that “Operable parts shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate operable parts shall be 5 pounds (22.2 N) maximum.”

Tactile warning for the visually impaired
Tactile warning is a special texture applied to the outside lever to alert the visually impaired to a potential hazard on the opposite side of the door (exit to street, a workshop or other hazardous area, etc). Tactile warning is typically applied to the outside lever only, and is specified by an 8 prefix on the lever design.

Milled

Knurled

Order as follows:
8AT for Athens
8RO for Rhodes
8SP for Sparta
8LT for Latitude
8LN for Longitude

Life safety
The Schlage ND is UL listed for use on 3-hour fire doors up to 4’0” x 10’0”. The Boardwalk, Longitude, Omega, Rhodes, Sparta and Tubular levers comply with the California State fire code for return to within \( \frac{1}{2} \)" of the door face.

Additionally, the Schlage ND exceeds the BHMA warped door test by 4x. The BHMA standard requires that the latch be able to retract with a 50lb pre-load; the ND can retract the latch with a 200lb preload - providing more range to open the door in the event the opening becomes bound or otherwise compromised.

Classroom security indicator rose
Schlage ND classroom security functions come standard with an indicator rose that clearly identify key rotation direction for rapid lockdown. For ND mechanical classroom security function only.

Door handing
The ND lock family can be configured during installation to support any door handing. As a result, it is not necessary to specify handing during the ordering process.
The ND mechanical lock, along with being Schlage’s best selling mechanical lock, is the foundation for both the wired electrified and NDE wireless electronic lock. Not only did Schlage invent the cylindrical lock, but we continue to make it better with capabilities such as:

- **Unparalleled strength** - the lock prevents access even when subjected to torque loads up to 3,100 in-lbs (2.6x BHMA¹), withstands pry bar attacks of 1,600 lbs (8x BHMA requirements¹), and withstands 100 hammer blows (20x BHMA requirements²)
- **Exceptional durability** - cycle tested to over 16M cycles (16x BHMA requirements¹) with near zero droop or wobble - without the use of set screws or O-rings
- **Improved feel** - improved strength and durability are more than numbers, you can actually feel it in the lock
- **Improved installation** - installation is even easier than before (and without any set screws or O-rings)

All this is in addition to what you know and expect with the Schlage ND: 31 mechanical functions (plus wired electrified and wireless electronic) to meet the needs of any application; nine lever designs that suite with other Schlage locks and Von Duprin exit devices; renowned sales, customer and technical support.

¹ Beyond grade 1 performance for ND locks with Schlage cylinders only (standard, FSIC & SPIC). Performance with non-Schlage cylinders will exceed BHMA grade 1 requirements but may be less than the performance of products with Schlage cylinders.

² Vertical impact testing stopped after 100 blows with no sign of failure or stress.

ND94PD F84 Classroom lock
- Outside lever disengaged and unlocked by key.
- Vandlgard allows outside spindle to disengage from latch when locked.
- Inside lever always free for immediate egress.

Schlage ANSI
ND95PD Classroom security lock
- Key in either lever locks or unlocks outside lever.
- Vandlgard allows outside spindle to disengage from latch when locked.
- Inside lever always free for immediate egress.

Schlage ANSI
ND96PD F86 Storeroom lock
- Outside lever always disengaged.
- Entrance by key only.
- Vandlgard allows outside spindle to disengage from latch when locked.
- Inside lever always free for immediate egress.
ND Series other special functions

ND30D
Patio lock
Push button locking. Turning inside lever or closing door releases button, preventing a lock-out. Inside lever always free for immediate egress. Specify per XN12-007.

ND25 x 80PD
Storeroom exit lock
Blank plate outside. Key in fixed inside lever retracts latch. Specify per XN12-005.

ND25 x 70PD
Classroom exit lock
Blank plate outside. Key locks or unlocks inside lever. Specify per XN12-004.

ND60PD
Vestibule with closed outside lever
Same as ND60 except outside lever is closed. Inside lever always free for immediate egress. Specify per XN12-001.

ND70 x 80PD
Classroom by storeroom lock
Key locks and unlocks outside lever. Key in fixed inside lever retracts latch. Specify per XN12-006.

ND72PD
Communicating lock
Key in either lever locks and unlocks respective lever. Specify per XN12-002.

ND72PD
Vandlgard communicating lock
Communicating, ND72, lock with Vandlgard. Key in either lever locks and unlocks own lever. Both inside and outside levers are clutching. Specify per XN12-003.

Electrified locks can be found in the electrified section of the brochure (page 18).
The ND wired electrified lock complements the ND mechanical lock by working with access control systems to provide advanced security in high traffic areas. Because the electrified ND uses a motor instead of a solenoid, it offers unparalleled energy efficiency and flexibility in wired electrified applications.

More ECO. A maximum current draw of 0.23 amps not only saves energy, but by allowing more locks to run off a single power supply it saves money as well. The low 0.010 amp holding current eliminates any potential for hot levers in electrically locking applications or in electrically unlocking applications where the door is left open for long periods of time.

More FLEX. The electrified ND has flexibility for any application—it automatically operates from 12 to 24VDC, and the operating mode (electrically locked or unlocked) can be changed by simply toggling a switch on the chassis. Request to Exit (RX) can even be added with a simple upgrade kit.

The electrified ND has a number of other features and benefits. Incredibly quiet operation. Tested to over 4x BHMA standards. The electrified ND also comes standard with the Allegion connect Molex™ connector system (may be cut off and installed using traditional splicing methods if desired).

NDE wireless electronic locks

NDE wireless locks simplify installation by combining the lock, credential reader, door position sensor and Request to Exit (RX) into a single integrated design. NDE shares the same standard cylindrical door prep as the ND lock and installs in minutes with only a Philips screwdriver.

Built-in Bluetooth® enables NDE wireless locks to connect directly to smart phones and tablets—no need for a proprietary handheld device for set-up and configuration.

Built-in Wi-Fi enables NDE to connect directly to an existing Wi-Fi network for automatic updates to access rights and configuration.

With the ENGAGE cloud-based web and mobile apps, it’s easy to configure lock settings, manage access rights, and view audits and alerts from anywhere. Updates can be sent any time at the lock with the ENGAGE mobile app and occur automatically overnight when NDE is configured to connect to a Wi-Fi network.

NDE wireless locks can also be connected to the ENGAGE Gateway for real-time networked communication with software from one of our software alliance members.
NDE wireless electronic locks

Function

Schlage ANSI NDE80PD F86 Lock with Vandlgard

• Can be used for perimeter doors, suite entrances, offices, and sensitive storage spaces.
• Lockset is normally secure with outside lever disengaged.
• Valid credential or key momentarily unlocks door.
• Valid credential may be used to change to a passage or secured state.
• Lock schedule may be implemented to put the lock in a passage or secured state.
• Inside lever always allows free egress.

ENGAGE cloud-based web and mobile applications

ENGAGE cloud-based web and mobile apps make it easy to configure lock settings, manage access rights and view audits and alerts from anywhere.
Cylinders and key systems

A strong lock is only part of the security solution—proper key control is equally important. Schlage offers extensive options to meet the security needs of the specific project.

### Cylinders

**Conventional KIL cylinder options**
- 6-pin length (standard)
- 7-pin length in SL cylinder
- Available in Schlage Classic and Everest 29™ open and restricted keyways
- Primus® XP security features and geographic exclusivity
- Primus XP UL 437 listed high security features
- Hotel cylinder (for use in faculty restroom function)

**Full size interchangeable core (FSIC) options**
- 6-pin length
- Available in Schlage Classic and Everest 29 open and restricted keyways
- Interchangeable core compatible with conventional cylinder key systems
- Primus XP security features and geographic exclusivity

**Small format interchangeable core (SFIC) options**
- 7-pin combined Everest 29 R restricted keyways
- 6 or 7-pin uncombined Falcon®/Best® keyways

---

### Key systems

**Classic keyway**
- Open keyway—keys are duplicated and available without ordering formalities
- Upgradeable to Primus XP and UL 437 levels of security

**Everest 29**
- Patented through 2029
- Key duplication is restricted providing a higher level of security for the cylinder
- Can be integrated to an existing Everest B, C, or D system
- Upgradeable to Primus XP and UL 437 levels of security

**Primus XP**
- Independent, dual locking mechanisms
- Unique side bit milling on key makes unauthorized duplication highly enforceable
- Allows creation of geographically exclusive keys in a thousand available combinations
- Provides patent protection when applied to Schlage Classic keyways
- Compatible to all Everest and Everest 29 keyways

**Everest 29 SL**
- A high security conventional (KIL) cylinder pinned on an A2 system compatible with the Schlage Everest B and Everest 29 R keyways
- Users can expand existing Everest B and Everest 29 R key systems
- Enables Primus XP and UL 437 upgrades on SFIC keyways

---

1 Available in 606, 622, 626 and 643 plug face finishes; Everest 29 S123 keyway standard.
2 Available 606, 613 (simulated), 622, 626 and 643e finish only.
3 Restricted keyway cores require authorization from the end user.
4 Must be ordered separately from lock; not available factory keyed.
Readers and credentials

Schlage's comprehensive portfolio of electronic credentials and wall mount readers are designed to provide enhanced levels of security, efficiency and convenience to any facility.

**Proximity (125 kHz) technology:**
- Basic open contactless technology; recommended for legacy systems only
- Encoded with a unique number that cannot be updated or changed

**Smart (13.56 MHz) technology:**
- Advanced contactless technology, more secure than magnetic stripe and proximity options
- Advanced data encryption secures against duplication
- Recommended for new systems
- Open platform, designed to work with a wide array of systems and applications beyond access control

**Multi-technology options that provide flexibility:**
- All multi-technology credentials and readers feature aptiQ technology with either magnetic stripe or proximity
- Enables migration from legacy platform to secure smart technology
- Reader options available with keypad for +PIN for high security applications

**Credentials**
Options include clamshell or ISO cards, keyfobs, wristbands and mobile.

**Readers**
Single-technology proximity (PR) and smart (SM) readers available in a mini mullion design. Multi-technology (MT) options include mullion, single gang and single gang with keypad (K).

**Power supplies**

Schlage power supplies are designed for speed and ease of installation upfront with the assurance post installation of the highest quality output in terms of even power flow to protect downstream devices.
**Lock options**

**Latches**

ND latches are adjustable for flat or beveled edge doors, and are finished to match the lock trim. All ND Series latches have $\frac{1}{2}$" throw and 1" housings except the anti-friction fire door latch, which has a $\frac{3}{4}$" throw. Please see the Schlage pricebook for more options including extended backset strikes (up to 5") and rabbited latch and strike kits.

1 Not available NDE wireless electronic

#### Inside lever

Specify only if different from outside lever. Same options as outside lever.

#### Inside finish

Specify only if different from outside finish. Same options as outside finish.

#### Latch

Specify only if different from standard latch; see page 24 for options.

#### Strike

Specify only if different from standard strike; see page 24 for options.

#### Door thickness

Specify only if outside standard door range (1 1/8"-2 1/4"). Extended door thickness not available NDE wireless electronic.

#### Extension

Specify only for doors 2 1/4" or greater. Example: EE = Extended Equally, EI = Extended Inside, EO = Extended Outside, ED = Extended Differently

#### Dimension

Specify only for non-standard strike lip length.

#### Options

Specify any additional requirements or options. Example: KA = Keyed Alike, KD = Keyed Different, 0bit, etc.

<tr>
<th>ANSI/BHMA</th>
</tr>
</thead>
<tbody>
<tr>
<td>All ND Series comply with A156.2 performance requirements for grade 1 cylindrical locks. Wired electrified complies with A156.25 (indoor), wireless electronic complies with A156.25 (indoor/outdoor) requirements for electrified locking devices</td>
</tr>
</tbody>
</table>

| ICC |
| Complies with ICC A117.1 Accessible and Usable Buildings and Facilities |

| UL/cUL |
| All locks 3 hour A label single firedoor 4'0" x 10'0"; pair doors 3 hour firedoor 8'0" x 8'0" with ⅛" latch option; pair doors 90 minute fire 8'0" x 10'0" with ⅛" latch option |

| CA Fire Code |
| All levers with a return to door of ⅛" (64 mm) or less comply (Rhodes, Sparta, Tubular, Omega, Longitude and Boardwalk) |

| FL Building Code |
| Complies with Florida Building Code (ASTM E330, E1886, E1996) and Miami Dade (TAS 201, 202, 203) requirements for hurricanes |

| Federal |
| Meets FF-H-106C Series 161 |

| Other |
| UL294, CSA C22.2 No. 205-M1983, FCC Part 15, IC RSS-210, RoHS |
1. Provide Schlage ND Series cylindrical locks conforming to the following standards and requirements:
   a. ANSI/BHMA A156.2 Series 4000, Grade 1
   b. UL10C for 4’0” x 10’0” 3-hour firedoor
   c. Florida Building Code (ASTM E330,E1886, E1996) and Miami Dade (TAS 201, 202, 203) requirements for hurricanes

2. Provide cylindrical locks exceeding the ANSI/BHMA A156.2 Grade 1 performance standards for strength, security and durability in the categories below:
   a. Abusive locked lever torque – minimum 3,100 inch-pounds without gaining access
   b. Offset lever pull – minimum 1,600 foot pounds without gaining access
   c. Vertical lever impact – minimum 100 impacts without gaining access
   d. Cycle life – minimum 16 million cycles
      1. With no visible lever sag
      2. Without the use of performance aids (i.e. – set screws, spacers, etc.)

3. Provide locksets with solid cast levers and wrought roses on both sides. (ND mechanical, ND wired electrified)
   a. Lever design: Rhodes, Athens, Sparta, Tubular, Omega, Latitude, Longitude, Broadway or Boardwalk
   b. Rose design: Rhodes (used with Rhodes, Athens, Sparta, Tubular, Latitude, Longitude, Broadway or Boardwalk levers) or Omega (used with Omega lever)
   c. OPTION (where required by Authority Having Jurisdiction)- Provide tactile warning on levers on exterior (secure side) of doors serving rooms or areas considered to be hazardous.
   d. OPTION - Provide break away Rhodes levers for an additional level of security

4. Provide locksets with solid cast levers and cast escutcheons on both sides (ND wireless electrified)
   a. Lever design: Rhodes, Athens, Sparta, Latitude, Longitude, Broadway or Boardwalk
   b. OPTION (where required by Authority Having Jurisdiction)- Provide tactile warning on levers on exterior (secure side) of doors serving rooms or areas considered to be hazardous.
   c. OPTION - Provide break away Rhodes levers for an additional level of security

5. Provide locksets with solid steel anti-rotation through bolts and posts to control excessive lever rotation

6. Provide independently operating levers with two external return spring cassettes mounted under roses to prevent lever sag.

7. OPTION/Standard NDE wireless electrified – Provide Vandlgard/Free-Wheeling levers with vandal resistant technology for use at heavy traffic or abusive applications.

8. OPTION - Provide cylindrical locks with an inside indicator feature on a 626 finish for the Rhodes and Omega roses that provides clear direction for users to safely and quickly secure the room
   a. ND75 and ND95 – Standard
   b. ND60 and ND93 – OPTION

9. Provide locks with standard latches featuring a 2 1/2” (70 mm) backset and a 1/8” latch throw capable of UL listing of 3 hours on a 4.0 x 10.0 opening. Provide proper latch throw for UL listing at pairs.

10. Provide standard ASA strikes unless extended lip strikes are required to protect trim.

11. OPTION ND mechanical – Provide reconfigurable lockset chassis that allows lock function to be changed to over twenty other common functions by swapping easily accessible parts

Add for ND wired electrified

12. Provide wired electrified options as scheduled in the hardware sets.
   a. 12 through 24V DC operating capability, autodetecting
   b. Selectable EL (Fail Safe)/EU (Fail Secure) operating mode via switch on chassis
   c. 0.230A (230mA) maximum current draw
   d. 0.010A (10mA) holding current
   e. Modular / “plug in” Request to Exit switch

Add for NDE wireless electronic

12. Provide lockset with additional standard compliance:
   a. Listed, UL 294 - standard of Safety for Access Control System Units
   b. Compliant with ANSI/BHMA A156.25 Grade 1 Operation and Security
   c. Certified to FCC Part 15

13. Provide credential reader module in the following configuration, as indicated in the door hardware sets. Multi-technology contactless reader shall be NFC-Compatible, including NFC Peer to Peer compatibility, and read access control data from both 125 kHz and 13.56MHz contactless smart cards.

14. Provide lockset with the following switches/monitors standard:
   a. Door Position Sensor (DPS)
   b. Interior cover tamper guard
   c. Request to Exit (RX) switch

15. Provide locksets with the following features:
   a. Ability to communicate unit’s communication status
   b. Visual tri-colored LED indicator that indicates activation, operational systems status, system error conditions and low power conditions
   c. Audible feedback that can be enabled or disabled
   d. Tamper resistant torx screw on inside escutcheon

16. Provide lockset with open architecture characteristics capable of handling new and existing access control software and credential reading technology

17. Provide lockset powered by four AA batteries
   a. Provide locksets able to communicate battery status and battery voltage level by means of application on mobile device at the door or remotely via integrated software

---

1. Beyond grade 1 performance for ND locks with Schlage cylinders only (standard, FSIC and SFIC). Performance with non-Schlage cylinders will exceed BHMA Grade 1 requirements but may be less than the performance of products with Schlage cylinders.
About Allegion

Allegion (NYSE: ALLE) is a global pioneer in safety and security, with leading brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Focusing on security around the door and adjacent areas, Allegion produces a range of solutions for homes, businesses, schools and other institutions. Allegion is a $2 billion company, with products sold in almost 130 countries.
