

Readers & credentials transition information

The aptiQ and XceedID reader and credential portfolios will carry the Schlage brand, effective September 25, 2017. Although the brand name is changing to Schlage, many things are not changing: products, part numbers and compatibility all remain the same. Forward and backward compatibility does not change and products may be used interchangeably.

Credential Transition Guide

Old Brand	New Brand	Part Number (no change)	Product Description (no change)
