

FALCON®

Classroom security indicators

MA Series locks

Overview

Securing classroom doors is a high priority in any emergency situation to protect the students and teachers inside each room. Falcon products provide peace of mind that at their most basic level, these critical security needs are met at a value price. The Falcon MA Series mortise lock with indicator provides an at-a-glance verification of the locked/unlocked status of the door from inside of the classroom. Anyone can quickly identify if the door is secured or if it needs to be locked before proceeding with other protocol and procedures that a school might have in place. The status of the door can be changed from Locked (red) to Unlocked (green) by inserting a key into the cylinder and turning, and the status window can be seen from distances near and far within the room. This product can be ordered with a new lock or as a part to update existing MA441 classroom security function locks.

* Window dimension: 1 1/8" x 3/4"

Ordering instructions

Falcon classroom security: MA Series lock

| Function | Description | Lock | Levers | Application | Trim | Finish | How to Order |

Keeping schools secure with Falcon

In addition to classroom security locks with indicators, Falcon has a full line of door hardware products to aid in a school's safety and security.

Falcon T Series lock

Classroom security function lock

Application

The T Series lock with classroom security function is a Grade 1, heavy duty, high traffic cylindrical lock that gives teachers and faculty the ability to lock down a room with a key from the inside of the door.

Falcon 25 Series exit device

Electric latch retraction

Application

Electric latch retraction can be used to assure constant monitoring of exterior doors, and control of who enters and when they enter to ensure security.

Falcon SC70 Series door closer

Regular arm

Application

The SC70 Series door closer ensures your doors latch after being opened. In the event of a critical situation, doors that are closed and latched can be quickly locked and secured.
