Protect the opening, stock less overheads, and sell more.

Commercial and institutional projects require investing in quality doors, frames, and door closers by limiting the force of door swing. With high traffic and abuse, extending the life of your opening with an overhead is the way to go. Typically overhead models come in different sizes and functions, making it complicated for customers to stock, specify or install.

The new Glynn-Johnson 510 and 550 Series heavy duty, adjustable overhead makes your investment not only smart, but simple. Simply stock one 510 or 550 and it is versatile enough to replace dozens of skus in inventory, making this the most comprehensive overhead available in the market today.

Key features
- Heavy duty for high traffic
- Concealed mount (510 Series)
- Surface mount (550 Series)
- Field adjustable to door width
- Easily adjust stop and hold open function
- Adjust to friction hold open with conversion kit
- Degree of opening is field adjustable from 85° - 110°
- Shock absorbing spring allows for less abrupt dead stop
- Perfect compliment to the LCN aluminum closer to protect your door frame
Installation instructions

The Glynn-Johnson 510 or 550 instruction sheets come with your order and are available on us.allegion.com for download. Better yet, watch our Glynn-Johnson install video for how to:

1. Adjust the slider arm for door opening width
2. Set the stop or hold functions
3. Measure and drill hole locations

Closer compatibility

Overhead stops and holders are ideally used in conjunction with a closer. With Glynn-Johnson overheads and LCN closers, you can have peace of mind knowing high performance products are working to protect your door, hardware, and frame from abuse.
