ISONAS Pure Access is a family of leading access control software products comprising our fully hosted platform, Pure Access Cloud, and an on-premise option, Pure Access Manager. Pure Access provides a complete access control platform allowing for full installation, administration, and management of our patented Pure IP™ access control hardware. The modern user interface establishes a new standard for ease of use in managing an unlimited number of access points across any geography through a mobile device, tablet, or modern browser. Pure Access brings new features and functionality to access control that fully leverage the power of our Pure IP™ hardware solution.

**Readily Available**

Pure Access is available anytime from anywhere. All you need is a device (phone, tablet or desktop browser) that can connect to the internet.

**Access Point Configuration Wizard**

Set up and configure your access points in a matter of minutes, reducing overall installation time and costs. The step by step access point check out process allows you to test the IP configuration and connectivity, the lock wiring and other accessories all from your mobile device.

**Simple and Modern User Interface**

Intuitively add users, access points, and rules with our drag and drop functionality. Simplified workflows provide an easy to use system that requires minimal training.

**Customizable Dashboards**

Individual dashboard widgets allow you to customize how you monitor your system in real time. The responsive design provides a fully interactive monitoring capability from your mobile device, tablet, or modern browser.

**Product Compatibilities:**

- ISONAS PowerNet™ Reader-Controller RC-03 models
- ISONAS PowerNet™ IP-Bridge, all models
- ISONAS Pure IP Reader-Controller RC-04
- ISONAS Pure IP Wiegand Reader R-1
**What is Pure Access Manager?**

- Browser-based web application that is hosted on the customer’s network
- The infrastructure uses a PostgreSQL database on a Windows® Server and the web application is written in Java served up by Apache Tomcat
- The same features and functionality of Pure Access Cloud are available
- The ability to manage sub-tenants exists in the Cloud application only, not in Pure Access Manager
- Software upgrades are offered as an additional service in a one, two or three year program

**Pure Access Manager Infrastructure**

**HARDWARE SYSTEM REQUIREMENTS**

- Windows® Server 2012R2 or newer
- Intel i5 or greater
- 8GB ram
- 500 GB HDD
- OR
  - Virtual Environment with a hypervisor download
  - 80GB of disk space available from the VM
