About Allegion
Allegion (NYSE: ALLE) is a global pioneer in seamless access, with leading brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss® and Von Duprin®. Focusing on security around the door and adjacent areas, Allegion secures people and assets with a range of solutions for homes, businesses, schools and institutions. Allegion had $2.7 billion in revenue in 2018, and sells products in almost 130 countries. For more, visit www.allegion.com.

Vandlgard® protection
All locking features function field reversible Vandlgard® protection. The outside lever rotates freely up and down when locked, limiting the ability of vandals to apply excessive force which could damage the lock.

New ALX Series example:
- 1 modular chassis supporting all functions and cylinder options in 626 finish
- 1 locksmith function kit in 2⅜" backset containing five functions: 10, 40, 50, 53, and 80 (4 functions also support Vandlgard)
- 1 lever design – Saturn, in 3 variations: KIL, Button, and Closed

Cost: $265 @45% of list
Remaining inventory value after 1 service call - $173
Creates any of 9 different lock configurations

Legacy AL Series example:
- 5 factory-configured locks in 10, 40, 50, 53, and 80 functions (less cylinder)
- 1 finish – 626
- 1 lever design – Saturn

Cost: $475 @45% of list
Use: 5 specific lock configurations only

Schlage ALX Series
Grade 2 modular, cylindrical lock

The proven AL Series has evolved. “X Factor” qualities born from modular design, define a new lock that exceeds expectations. AL Series has always offered a combination of strength and durability at a price point favorable to any application. Though these qualities remain, the lock has changed. Its evolution to the ALX Series is a revolution in lock design. Modularity lets you do more with less inventory and problem solve in the moment with field-configurable solutions that could dramatically reduce callbacks when unplanned needs arise.

Vandlgard® protection (continued)
All locking features function field reversible Vandlgard® protection. The outside lever rotates freely up and down when locked, limiting the ability of vandals to apply excessive force which could damage the lock.

The X Factor
A lock designed to exceed expectations

Exceptional durability and expanded cylinder and lever options are just part of the ALX story. You also get extreme installation simplicity and speed – on the door in just over a minute; and excellent warranty coverage – a 10-year limited warranty, so you know it’s going to last. In all, ALX Series is an unexpected value for both you and your customers. Designed as a modular lock and built on a single chassis, the Schlage ALX Series provides an advantage both on the job site and in the warehouse. Flexible buying options means you can purchase it configured, as lock less lever or in kitted form as separate chassis, function and lever kits each laddering up to the same list price.

What could you do with this much flexibility?
Just one chassis in your warehouse and on your trucks in your market’s most prevalent finish and lever style can become whatever you may need in the moment:

- 1 chassis kit in 626 finish
- 2 locksmith assortment function kits in both 2 3/4” and 2 3/8” backsets
- 3-4 lever types
  - (button, closed, and two to fit your most commonly used cylinders)
- Any of 16 different lock configurations

Levers are sold in 5-packs of one design. You can mix and match your own variety packs and buy single function 5-packs or the locksmith function mix to help you optimize truck stock. (Locksmith mix function kit: 10 passage; 40 bath/bedroom privacy; 50 entrance/office; 53 entrance; and 80 storeroom)

Levers are sold in five packs of same design with inside levers defined by function, finish and design and outside levers by function/ cylinder, finish and design.

Maximum utility
One chassis fits all functions and cores to minimize inventory

Exceptional durability
- Deep-drawn spindle with 5 points of lever engagement prevents droop and wobble
- Grade 1 compression springs

Function flexibility
- Patent pending chassis design allows quick, in-field function set up
- Field reversible Vandlgard® to non-Vandlgard locked lever engagement

Function kit components
- Kits include appropriate latch, interior, and exterior components to create the desired function

Outside lever pack options
- CL – closed (no hole)
- BT – button

Inside lever pack options
- CL – closed (no hole)

Inside lever pack options
- CL – closed (no hole)

Function kit components
- CL – closed (no hole)

Cylinder lock
- CL – closed (no hole)

Chassis kit component
- KIL – also used on privacy

Extreme installation simplicity
- Accommodates 1 1/4” to 1 3/4” door thickness with minimal chassis adjustment
- Captured screws in latch, strike and inside spring cage eliminate small, loose parts

Expansive lever offering
- Perfectly suites with ND Series levers to offer 10 total lever designs

Exceptional durability
- Deep-drawn spindle with 5 points of lever engagement prevents droop and wobble
- Grade 1 compression springs

Maximum utility
- One chassis fits all functions and cores to minimize inventory

Function flexibility
- Patent pending chassis design allows quick, in-field function setup
- Field reversible Vandlgard® to non-Vandlgard locked lever engagement

Expanded cylinder support
Available levers accept all Schlage plus five competitive cylinder formats

What could you do with this much flexibility?

Just one chassis in your warehouse and on your trucks in your market’s most prevalent finish and lever style can become whatever you may need in the moment:
- 1 chassis kit in 626 finish
- 2 locksmith assortment function kits in both 2 1/4” and 2 3/4” backsets
- 3-4 lever types (button, closed, and two to fit your most commonly used cylinders)
- Any of 16 different lock configurations

Chassis kits are chosen solely by desired finish. They are shipped non-Vandlgard and can be configured to Vandlgard without the need for extra parts.

Function kits are sold in packs of five defined by function, finish, and latch backset. Locksmith assortment kits are available.

Levers are sold in five packs of same design with inside levers defined by function, finish and design and outside levers by function/ cylinder, finish and design.
