

# HandPunch® 1000

Biometric time and  
attendance terminal

## Overview

### **A biometric time clock that is truly affordable for small to midsize businesses**

Schlage now brings the accuracy and convenience of biometric technology easily within reach of any time and attendance applications. In operations that range from the corner deli to franchise chains, Schlage products have proven themselves to be a practical and precise solution. Our terminals are so affordable, card-based systems seem obsolete.

### **Your hand is your card**

There are no cards to create, administer, carry, or lose. The HandPunch® 1000 verifies employees' identities in less than one second, based on the unique size and shape of their hands. For small companies, the HandPunch 1000 provides a quick return on investment by eliminating the cost associated with administering and managing cards. For companies that have small, multiple locations, minimal supervision leaves opportunity for buddy punching and time fraud. With the HandPunch 1000 one employee can't punch for the other. Time fraud is eliminated thereby reducing payroll costs and increasing the company's bottom line.

### **Pay as you grow**

Designed to grow with your business, the user capacity of the HandPunch 1000 can be easily expanded in the field. Standard user memory provides for up to 50 employees with the expandability to grow to 512 users.

## Features and benefits

- Provides the most accurate time and attendance solution available
- Saves money over card-based systems
- Dramatically reduces payroll costs
- Eliminates badges
- Eliminates buddy punching
- Fast and easy to use
- Up to 512 users
- Platen also comes standard with a printed hand outline to ensure accurate hand placement while punching

### Hand geometry technology

The HandPunch 1000 uses Schlage's field-proven hand geometry biometric technology. The terminal captures an image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No fingerprints or palm prints are utilized. Green and red lights notify the employee of the status of each punch. There's no question any more; employees have to be there to punch.

### Small enterprise solution

The HandPunch 1000 provides a new solution for companies with 50 employees or less per terminal or location. The HandPunch 1000 terminal allows for collection of in and out punches plus allows easy connectivity to any time and attendance application. With the HandPunch 1000 small companies no longer need to worry about lost timecards, making new cards, or employees punching for another employee.

### Pay for only what you need

The HandPunch 1000 comes standard with user capacity for 50 users. As your business grows, so can the user capacity of the HandPunch 1000. Memory upgrades are available to expand to 100 or even up to 512 users. The upgrade can be easily performed in the field without removing the unit from the wall. With a built-in transaction memory to store over 5,000 punches, the HandPunch 1000 ensures your employees' data is safe.

### Communication options

The HandPunch 1000 connects quickly to the time and attendance PC via a provided 50-foot RS232 communications cable. An optional internal 14.4 K baud dial-up modem is available for remote sites.

### Antimicrobial protection

Every HandPunch contains a silver-based antimicrobial agent - which is embedded into the materials used to produce the platen, providing a finish that inhibits the growth of a broad spectrum of bacteria, mold, and fungi and remains active for the life of the HandPunch.

### Hand outline

The HandPunch comes standard with a blue hand outline printed on the platen. This hand outline will help new users place their hand accurately on the platen when using the terminal and decrease initial enrollment time.
