Overview
Conversion kits for Schlage L Series mortise locks provide a low-cost means to upgrade a classroom door’s functionality and security. Most Schlage mortise locks used in classroom environments already have the necessary flexibility built into the lock, so changing the functionality and security of the room can be as simple as changing the trim.

All options shown here include the new Schlage L Series mortise classroom security indicator. This indicator has a 2” x ½” display window with 180° visibility and a high-mount design so that the locked or unlocked status of the door is clearly visible. A full-text “Locked/Unlocked” message with symbols and color coding (red and white for distinction by individuals with color blindness) ensure there is no ambiguity as to the status of the door. The trim mounts to the inside surface of the door and works seamlessly with the lock, providing convenient and familiar ease of use in day-to-day or lockdown situations.

Conversion kits
Convert to inside thumbturn with indicator. Compatible with Schlage L Series, office/entry, apartment, classroom and classroom security functions (L/LV9050 and 56, 60, 70, 71).

Classroom upgrade kits – ND Series cylindrical locks
Conversion kits for Schlage ND Series cylindrical locks provide a low-cost means to upgrade a classroom door’s functionality and security. The design of the ND lock allows for the functionality to be changed without replacing the entire lock. The conversion kits even support full size interchangeable cores (FSIC) designs from competitive products including Sargent, Corbin Russwin, and Yale (see pricebook for conversion kits with competitive cores).

Supported lever designs
- Athens (ATH)
- Omega (OME)
