Overview

Multipoint Lock Tornado Shutter is specifically designed to secure window openings during tornadoes. Mounted on the inside of the room to protect occupants from flying glass and debris, Multipoint Lock Tornado Shutter is a integrated system consisting of a 4-sided frame and a shutter with a unique 3-point locking system specifically designed to meet all guidelines set forth in the FEMA 361 and 320 standards as well as ICC 500 for protection in tornadoes. The patented system secures the shutter to the frame at 3 locations - the top, bottom, and center latch points - and has been tested to withstand the most powerful EF5 tornadoes, providing protection from windspeeds up to 250 mph and 15 lb. projectile impacts up to 100 mph.
