The NDE Series wireless lock makes it easy and affordable to transition from mechanical keys to electronic access control wherever there is a need for increased security, safety and convenience throughout assisted living and long term care facilities. The NDE is an ideal solution for resident rooms, offices, and security sensitive spaces including medical supplies, food prep and treatment rooms.

**Security & safety**
- Increased visibility and control of more access points
- Audit trails provide usage history and reduces liability

**Reliability**
- Built on the same platform as the Schlage ND cylindrical lock

**Efficiency**
- Easy to retrofit; installs in existing mechanical door prep in minutes with only a Philips screwdriver
- Electronic credentials can be quickly issued and revoked for staff, visitors and residents
- Flexibility to manage access via ENGAGE™ cloud-based mobile and web-based apps, or as an extension of existing access control system

**Convenience**
- Use current credentials beyond perimeter doors
- Electronic credentials are easy to use by staff and residents
Improve security and safety for your residents, staff and facility

The NDE Series is the perfect solution for:

- Resident room doors
- Pharmaceutical or medical supply storage
- Offices
- Resident health record and file storage
- Treatment or exam rooms
- Food prep and service areas
- Janitorial, housekeeping and maintenance rooms
- Any opening that could benefit from audit reports for regulatory compliance

Resident safety

Protect residents from pharmaceuticals, cleaning products and dangerous equipment or supplies by restricting access to storage rooms, services areas and treatment spaces.

Privacy

Medical and other resident records deserve privacy, no matter what kind of healthcare facility. Secure administrative offices and areas where records are kept to ensure privacy and adherence to applicable HIPPA regulations.

Convenience & security

For assisted living and other facilities where residents require/prefer a private and secure space, using NDE wireless locks on their doors provides peace of mind, improves the resident experience, and electronic credentials are easier to use than keys.
NDE electronic features:

- Built-in Bluetooth® enables wireless configuration from smartphones and tablets; no additional cost for proprietary Handheld programming tool
- Built-in Wi-Fi enables automatic updates sent directly from host software; no need to visit the lock to update access rights and pull audits
- Available status signals include door position, request-to-exit, battery status, and lock/unlock
- Up to 2 year battery life with 4 AA batteries
- Reads proximity and smart credentials

NDE wireless locks offer flexible connectivity options to fit the infrastructure of the facility, as well as the budget.

1. **Mobile**

   Visit the lock to transfer updates. Use the ENGAGE™ cloud-based mobile and web apps to manage locks and users from anywhere.

2. **Wi-Fi**

   Connect locks to Wi-Fi network; updates and audits will be automatically scheduled and delivered from host. Use the ENGAGE™ cloud-based mobile and web apps from anywhere or software from one of our alliance partners to manage locks.

3. **Real-time**

   Connect locks via ENGAGE™ Gateway to host system; updates and audits will be automatically communicated in real-time. Use software from one of our alliance partners to manage locks and users from host system.

ENGAGE™ APP

The ENGAGE cloud-based web and mobile applications deliver simple and convenient site set-up with basic access management for users and locks.
