

KING COBRA/KING COBRA-2 NARROW STILE SERIES

INSTALLATION MANUAL

KC9232-8600/KC9232-8600-2

The KC9232-8600/KC9232-8600-2 is designed to replace the Adams Rite® 8650 cylinder escutcheon when used on the 8600 concealed vertical rod devices and 4780 Series vertical rod devices with paddle. Operation is similar to the use of the cylinder escutcheon. Enter a code or iButton or use the mechanical key and the knob becomes engaged so the rods can be retracted. See standard instructions for more information.

This sheet covers the specific requirements of the KC9232-8600/KC9232-8600-2 the standard template and instructions should be referred to for more information.

NOTES

- Spacer plate between the trim and door must be used for correct location of interface.
- Clear plastic spacer (**a**) between interface and baseplate must be used for correct location of interface. Do not use the black plastic spacer if you have it - it is too thick.
- Gasket may be used and will not interfere with location of interface.
- Place template (**b**) centered on existing escutcheon prep.
