

P513-734

Small Format Interchangeable Core Mortise Cylinder

Installation Instructions

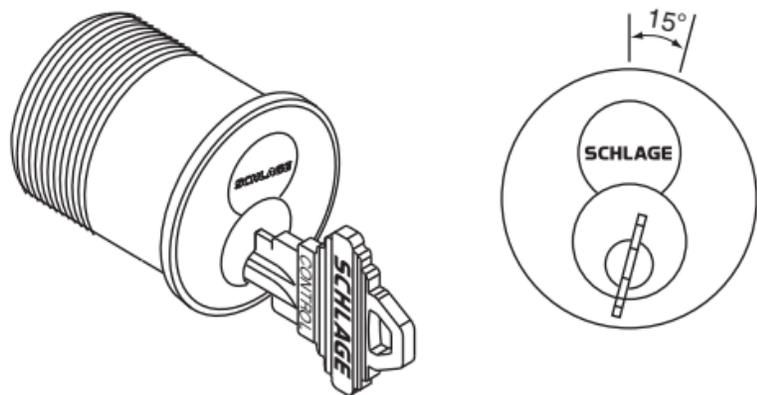

1 To Install Core

With control key fully inserted, push core into cylinder housing, rotate key 15° to the right and insert core completely. Rotate key back to the upright position and remove control key.

2 To Remove Core

Insert control key and rotate 15° to the right until action stops. Pulling on the key will now extract core from housing.
