1. Prepare door for exit device. See exit device instructions for holes and center lines.

2. Prepare door for trim:
   A. Transfer vertical center line from inside (exit device side) of door to outside (trim side) of door. Use extra care if edge of door is beveled. Be sure center line is parallel to edge of door.
   B. Locate and prepare holes as shown.

3. For NL trim, install cylinder (Figure 1), and install tailpiece guide in exit device cam (Figure 2).

4. Apply trim.

5. Apply device and thru-bolt to trim.

---

**Figure 1**

- Cut tailpiece to extend 7/16" to 9/16" out of exit device side of door.
- Tabs on cylinder retaining cup must fit into slots on trim plate.

**Figure 2**

- EO trim does not have pull handle.
- Metal door: 1/4" dia., 4 places
- Metal door: this side
- Wood door: thru

---

The 210DT/EO/NL trim corresponds to center line on exit device instructions.

---

For cutouts on inside face of door, see exit device instructions.
