1. Prepare door for exit device. See exit device instructions for holes, line XX, and center lines.

2. Prepare door for trim:
   A. Transfer line XX from inside (exit device side) of door to outside (trim side) of door. Use extra care if edge of door is beveled. Be sure center line XX is parallel to edge of door.
   B. Locate and prepare holes as shown.

3. Prepare trim:
   A. For NL function, remove TP adapter cam and install NL adapter cam (see other side).
   B. For NL or TP functions, change handing if necessary (see other side).
   C. For NL or TP function, install cylinder (see other side).

4. Apply trim.

5. Apply exit device.

For cutouts on inside face of door, see exit device instructions.
