1. Prepare door for exit device. See exit device instructions for holes, line X-X, and center lines.

2. Prepare door for trim:
   A. Transfer line X-X from inside (exit device side) of door to outside (trim side) of door. Use extra care if edge of door is beveled. Be sure center line X-X is parallel to edge of door.
   B. Locate and prepare holes as shown.

3. Install cylinder:
   A. Cut off tailpiece to proper length (Figure 1).
   B. Install cylinder and assemble component parts as shown (Figure 1).

4. Apply control.

5. Apply exit device.
   A. Test key, control, and device action.

For cutouts on inside face of door, see exit device instructions.
