**INSTALLATION DIRECTIONS**

**BEFORE APPLYING THIS DEVICE**

A. Threaded device must be inserted.
B. Doors must be fitted and hung.
C. Check that handle of hardware corresponds with handle of door. (See instruction sheet #10333 for changing the door handle, if necessary.)

**1. APPLY STRIKE**

A. Tape appropriate strike to template to stop.
B. When Von Duprin Mullock is used apply strike at tapped holes in Mullock. (See illustration 1, 2, or 3.)
C. For single door application. (See illustration 4, 5, or 6)

**2. PREPARE DOOR**

A. Type 51 size template No. 1 or 2, depending on height of door, to inside face of lock site. See door height schedule.
B. Center orientation of lock style case is parallel to stop and that edge of strike must be trimmed to correct side of edge of door.
C. Shipped out if lock case is mounted more than 3/16 from edge of door.
D. Strike.
E. Press door as shown. See Fig. 1 for wood door application, and Fig. 2 for metal door application.

**3. APPLY OUTSIDE TRIM FOR DOOR APPLICATION ONLY**

A. See directions in the caption. Note that the template corresponds to Fig. 1, 2, or 3, device template and is parallel to edge of door.
B. Press out face of lock site.
C. Press outside face of lock site.
D. Apply outside trim.

**4. APPLY LOCK STYLE CASE**

A. Attach lock style case to door. (See Fig. 1 or 2.)

**5. APPLY HINGE STYLE CASE AND CROSSBAR TUBE (FIG. 4)**

A. Dog bar trim in depressed position.
B. Slide crossbar tube on lock style and hinge style brace arms. (See schematic for noting sequence. See template.)
C. Crossbar is level and hinge style case is parallel to edge of door and extends to center of all exposed side.
D. Hinge style case is made and pressed in door for sea bath.
E. Apply hinge style case with crossbar in place.
F. Tighten the screws securely with their key and remove the excess for free action. (See direction No. 5, appendix for these instructions.)
