1. Prepare door for exit device. See exit device instructions for holes, line X-X, and center lines.

2. Prepare door for trim:
   A. Transfer line X-X from inside (exit device side) of door to outside (trim side) of door. Use extra care if edge of door is beveled.
   B. Locate and prepare all holes as shown.

3. For K trim with 8827 vertical rod device, install rim cylinder and cut cylinder tailpiece to extend 1/4" to 1/2" out of exit device side of door.

4. Cut knob spindle to be 1/8" to 3/8" less than door thickness.

5. Apply trim.

6. Apply exit device.
