**1. Obtain a 1-1/4” Mortise Cylinder.**

**2. Position Cylinder Cam.**
Make sure cylinder cam is in position shown with key removed (Figure A). If not, remove key, remove cam, and reinstall cam in position shown (Figure B).

![Figure A](image1.png)  
![Figure B](image2.png)

**3. Remove Center Case Cover and Cylinder Bracket.**

**4. Remove Dogging Hook and Bracket.**

**5. Install Lift Finger and Retainer Clip.**
Install lift finger thru back side of center case, and begin tightening the adjustment screw.

When the top slot in adjustment screw becomes visible, install retainer clip by snapping it into the slot. Continue tightening adjustment screw to raise the lift finger until it is snug against block.

Secure retainer clip with screw.
6 Install Exit Device and Cable System Per Device Installation Instructions Before Proceeding.

7 Reinstall Dogging Hook and Bracket.

! IMPORTANT: Confirm correct orientation of dogging hook.

8 Reinstall Cylinder Bracket.

9 Install Cylinder and Set Screw.

10 Adjust Lift Finger Per Device Installation Instructions.

11 Install Center Case Cover When Device Installation is Complete.
