Latch Guards

This assembly includes the following parts:

- **LGO-3**
  - For 3 Ft. Doors (Right Hand Reverse shown)
  - Latch Guard: 12"
  - Latch Guard Bracket
  - #8-32 Screw (11)

- **LGO-4**
  - For 4 Ft. Doors (Right Hand Reverse shown)
  - Latch Guard: 45 1/8"
  - Latch Guard Bracket
  - #8-32 Screw (11)

**Step 1** Remove Center Case Cover, Rod Guide, Latch Cover, and Bottom Rod.

**Notes:**
1. For fire door applications, this product can be used on hollow metal or metal clad composite fire doors only.
2. This Latch Guard will cover a Bottom Latch that projects as far as 1 13/16" from the door.
3. These instructions show right hand reverse installation. Left hand reverse steps are identical mirrored opposite door leaf.

**Customer Service**

**Step 2** Locate and Install Latch Guard Bracket. Use bracket as a template for drilling holes. 

**Step 3** Adjust and reinstall vertical rods per manufacturers' instructions. **Do not install Latch Cover.**
Step 4 Modify 4 ft. Latch Guard for door widths between 3 and 4 feet. If cutting is not necessary, skip to Step 5.

- Cut along line

- Deburr; round edges

- Drill 3/16" Ø holes 3 places

LG LENGTH = Door Opening Width minus 2 7/8"
Step 5 Locate Latch Guard and prep door.

Locate Latch Guard evenly across door (parallel with bottom of door)

Using Latch Guard as a template, drill & tap door for #8-32 Screws
(5) For LGO-4 (shown)
(3) For LGO-3

Step 6 Install Latch Guard.

#8-32 Screws (7) For LGO-4 (shown)
(5) For LGO-3
