- MT20W                    39.00.00
- ENGAGE                   6.1

***Who should update?***

Allegion recommends keeping all devices at your property up to date with the latest firmware and software. We strive to provide the best products and service for our customers.

Our latest firmware and software releases will allow the customer to get the most from their devices.

Specifically, all customers who would be interested in the following New Features and Recent Changes should update all the devices and mobile devices used at their property:

**New Features:**

- New options for additional wireless message authentication are now available
- New audits for deadbolt activity and status
- Implemented new ENGAGE 6.0 server commands for consistency with other ENGAGE devices

**Recent Changes:**

- Reduced the possibility of reporting duplicate audits
- Corrected the audits of expired and deleted Users
- Improved IP LINKED behavior during power cycle and brownouts making it more robust for Bluetooth disconnects and reconnect.
- The user interface blink pattern is correct when switching connections between IP Gateway and the Mobile application
- The user interface blink pattern is correct with Bluetooth commands
- Improved robustness with high credential counts
- More consistent and fewer missed reads of Mifare credentials
