• Drill ½" (13 mm) diameter hole, or drill and tap for #10-24 screw (8 holes).

• Center line of the ANSI 2½" cutout must be within a height range of 38" to 42½" and center line of exit device cannot be changed from 40¼"

• For exit only device, drill 2" diameter, half of door thickness depth. For trim applications, drill through.

• For applications over 8 feet (2.4 m), install two rod guides equally spaced on top rod.

• Less Bottom Rod (LBR) device cannot be used in conjunction with mortise or rim devices.

• For outside trim, see trim template for door preparation.

• For sexbolt preparation, refer to Template T-4014.
