INSTALLATION INSTRUCTIONS

FOR C821 TOUCH LATCH

NEW HAVEN, Conn. 06508
A DIVISION OF LEIGHT PRODUCTS, INC

PRINTED IN USA
MADE IN TAIWAN

1. Place the Touch Latch on the floor or shelf of the cupboard away from the door hinges. With the latch extending beyond the touch edge of the door.

2. Install the additional screw in the strike hole.

3. When no further adjustment is necessary, set the position of the Touch Latch on the strike floor or shelf of the cupboard. If necessary, adjust or loosen the screw to move the latch.

4. If the clearance is too great, loosen the screws and move the latch.

OPTIONAL INSTALLATION

and install the additional screw in the strike hole.

Locate by driving the screws through the strike holes in the latch.

and move it laterally slightly.

Adjust the Touch Latch as follows:

Select the touch latch's position

Open the door and move the latch until the door falls properly, close the door and move the latch until the door closes properly.

Then install the strike latch on the opposite side of the Touch Latch. Secure the strike latch with the screws provided. Make sure that the two screws are in the contact of the strike latch. Mark the touch latch and drive in the screws firmly with the touch latch.

Then place the Touch Latch and make sure it is in the front side of the Touch Latch. Secure the Touch Latch with the screws provided. Mark the touch latch and drive in the screws firmly with the Touch Latch.
