IMPORTANT: THIS DIAGRAM IS NOT TO SCALE AND FOR DIMENSIONAL REFERENCE ONLY! DO NOT TAPE TO DOOR & HEADER FOR USE AS A DRILLING TEMPLATE! USE THE PAPER DRILLING TEMPLATE THAT WAS INCLUDED WITH LOCK.

**NOTE:**
A variety of #10 fasteners are included in the hardware pack. Select the correct fasteners for the door and header materials involved:
- For wood or hollow metal doors and headers, use self-tapping sheet metal screws.
- For reinforced or heavy-gauge metal doors and headers, use machine screws.

*All holes, except the single 3/4" diameter hole, are symmetrical about the centerline.*
