The CT5000 is an offline single door controller that can be used to provide the convenience of access control to openings that do not require real-time monitoring. An audit trail can provide a record of who requested access. It can work with a variety of readers, as well as interface with peripheral devices such as automatic operators, electric strikes, and electromagnetic locks.

## Featured products

- **1** aptiQ™ SM10 reader
- **2** Schlage CT5000 single door offline controller (not shown)
- **3** Schlage 70 electromagnetic lock*
