ALLEGION TO FEATURE INNOVATIVE CONNECTIVITY PLATFORM AT BOMA IN LOS ANGELES

Conference Cornerstone Partner to Host Educational Learning Lab Session

CARMEL, IND. (May 29, 2015) – Allegion, a leading global provider of security products and solutions, will attend Building Owners and Managers Association (BOMA) International’s annual Every Building Conference & Expo, held June 28-30 in Los Angeles.

Allegion is proud to be a longtime BOMA Cornerstone Partner at the international level, committee participant at the national level, sponsor at regional conferences and an affiliate providing support at local BOMA groups.

BOMA International’s Every Building Conference & Expo delivers a gold-standard combination of information, expertise and industry connections that can’t be duplicated at any other event. Allegion will be located at Booth 608 inside the Los Angeles Convention Center, showcasing its latest innovation in safety and security products and solutions.

April Dalton-Noblitt, Allegion’s director of vertical marketing, will be hosting the ‘*Design, Workforce, and Technology Convergence, Are Your Offices on Trend?*’, a learning lab session that will explore emerging trends in office security and the IoT as well as demonstrate secure, open, flexible and interoperable solutions to consider in modernization efforts. The half-hour session begins at 11 a.m. Monday, June 29 and will be located in one of the Learning Lab rooms on the show floor.

Attendees are encouraged to stop by the booth for the chance to win one of Allegion’s new office access management solutions, which will be featured at BOMA. The prize includes: the Schlage® NDE Series wireless locks with ENGAGE™ technology, the cloud-based ENGAGE™ mobile and web application, plus 50 free mobile or smart card credentials.

The NDE Series wireless locks are designed to be easy to install, connect and use. This affordable electronic access solution for interior doors utilizes credentials, wireless locks and a mobile application, offering tenants the ability to manage and secure their space in ways that deliver simplicity and efficiency to their business.

“Electronic access control (EAC) is becoming a major trend in the CRE space, but in the past users shielded away from EAC for cost concerns and fear of system failure, among other reasons,” said Brad Aikin, business leader for electronic locks. “The NDE Series wireless locks address industry concerns and are a cost-effective, easy-to-use solution that ensures safety and security inside the building.”

These innovative locks are Wi-Fi enabled, allowing them to connect to an IT network for automatic daily updates. With the introduction of the ENGAGE™ gateway during the

conference, Allegion will now offer the ability to manage, update and monitor in real-time when connected over RS485 or IP to an alliance member system.

The ENGAGE™ mobile application – which is now available on Google Play in addition to the App Store – is compatible with Android and Apple devices. The cloud-based ENGAGE™ mobile and web application make it simple to configure lock settings, add users and view audits and alerts from anywhere.

“Tenants and property managers agree that nearly 50 percent of all offices are being converted to EAC prior to moving into their space, and we expect this number to increase as the Internet of Things (IoT) becomes more engrained in the planning phases of these audiences,” Aikin said. “We are excited to showcase the NDE Series wireless locks, the cloud-based ENGAGE™ mobile and web application’s capabilities, and our comprehensive product portfolio that includes integrated electronic locks, readers and biometrics at BOMA.”
