

ALLEGION™

Product standardization benefits

Standardizing solutions across your properties has many benefits. Not only will it save you time in building maintenance long-term, but it will make installation and maintenance more efficient.

Some additional benefits include:

- Promotes productivity through training on fewer products
- Ensures consistency of hardware and familiarity for all users
- Lowers maintenance cost due to common components throughout facility
- Improves safety and security for employees who work out of multiple locations
- Easier budgeting and cost management
- Reduces the risk of non-compliant hardware
- Improves clarity by eliminating the need for guesswork

With Allegion, taking control of your property's security has never been easier or more seamless. We'll help you develop your building standards and provide ongoing support for the products you select. Together with our team of 500 experts, we'll help you streamline your projects and create efficiencies.

Allegion services

Site assessments

We can assess existing buildings for compliance with current safety codes, building codes, ADA, and lockdown capabilities and make suggestions for improving security.

Access control coordination

We work with you to align existing technologies with our open architecture solution to control access and provide electronic lockdown capabilities. We make recommendations for platforms, coordinate EAC, and prepare cost analyses to gain alignment.

Key management

We can assist with layered security approach to key control, combining standard open security with restricted solutions to provide you total control of your facility.

Architectural services

Our architectural services team will work with your project architect to ensure door openings meet the functionality and security requirements, and specifications are developed with the product standards you have selected.

Budgetary planning

We can help you put together budgetary estimates to give you a glimpse into project costs prior to starting a project. From mechanical solutions to electronic access control, we are sure to have the solution that fits your project needs. And once a project is kicked off, we will review and comment on all door hardware submittals to ensure accuracy.

Code compliance

Our code experts can advise on adopted building codes to ensure fire, life safety and accessibility requirements are met.

Product standardization

We can help you standardize on solutions and products across your facilities to streamline costs and drive consistency throughout your buildings.

Healthy environments

Openings in healthy environments contain a variety of features including physical security solutions, electronic access control, sustainable products, and hardware for hands-free or touchless applications. We can help your team understand how healthy environment solutions can be incorporated in your building to promote health and wellbeing.

New construction/renovation projects

Focusing on pre-construction, our team can help improve construction planning and execution for doors, frames, hardware and access control. Improved door package planning can help mitigate risk and provide better coordination with the full project team. From pre-install site visits, budgetary hardware sets, training and post-install walkthroughs, our consultants create a more efficient procurement process.

Overtur™

Our proprietary platform is a centralized hub of door opening information for seamless communication and visibility throughout construction projects and beyond. Overtur can be used for surveying existing sites, specifying modernization and new construction projects, post construction punch walks, collaboration with team members, and more.

Hardware installation training

Allegion is here with you during every step of your project:

- Pre-installation: Meet onsite and train installers on correct installation of Allegion hardware.
- Post-installation: Meet onsite and walk every opening to assist you in preparing a door hardware punch list for the general contractor to ensure the job is completed accurately.
- Building turnover: Train the facility managers on Allegion hardware maintenance, troubleshooting and common infield adjustments.

About Allegion

Allegion (NYSE: ALLE) is a global pioneer in seamless access. We keep people and their assets safe, wherever they are, bringing together simple solutions, convenient access and advanced technology.
