Determine if Bottom Latch Retraction Adjustment is Necessary.

For 2-Point Latch Only

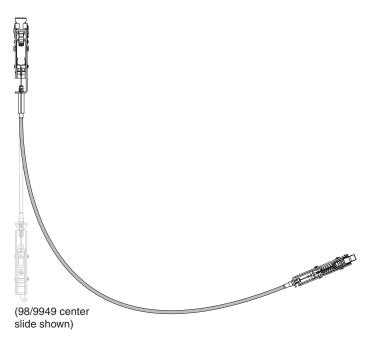

A CAUTION

Adjustment must be made while the top latch is in the hold-open position.

 a. Flex the cable into an L-shape as shown to simulate the installed condition of the latches.

b. To determine whether an adjustment is required, actuate the top latch to the hold-open position by pressing down on the connecting rod. Bottom latch should retract to within 1/16" of flush. If it does not, an adjustment is necessary.

If no adjustment is needed, proceed to Step 18.

Adjust Bottom Latch Retraction (if necessary). For 2-Point Latch Only

The conduit lock is used to make this adjustment.

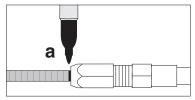

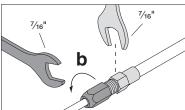

Adjustment must be made while the top latch is in the hold-open position.

 Use a permanent marker or tape to mark position of bottom cable conduit.

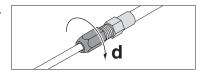

b. Loosen conduit lock nut so conduit is free to slide.

c. Pull until (1) extra wrap of conduit can be seen (1 wrap = 1/8").

- d. Hand tighten conduit lock nut.
- e. Repeat Step 16. Confirm bottom latch now retracts to within ½6" of flush.
